

# INTELLIGENT NATURE RESERVES

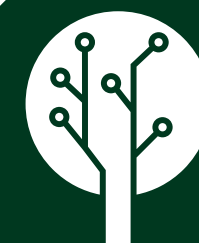

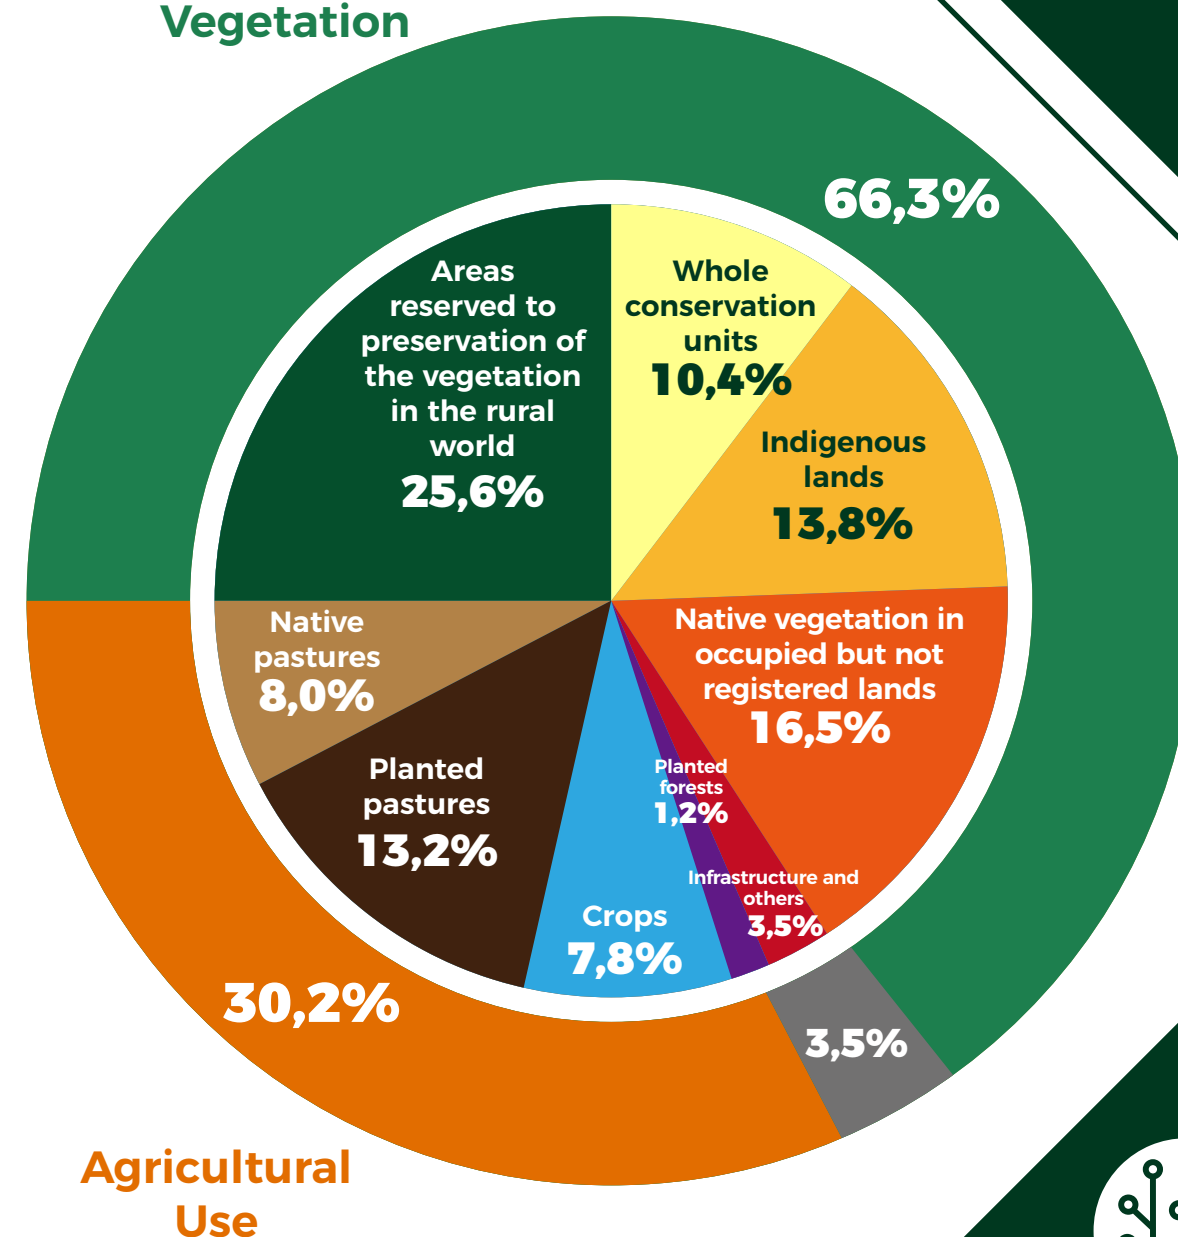

INTELLIGENT NATURE RESERVES

**ENVIRONMENTAL  
PRESERVATION IS  
A COMMITMENT  
TO LIFE ITSELF!**

# Brazil has 563 million of hectares in nature reserves that hold environmental potential for wealth generation

There are 218 million hectares of nature reserves inside private properties of rural producers

Area reserved to  
Protected and Preserved  
Vegetation

INTELLIGENT NATURE RESERVES

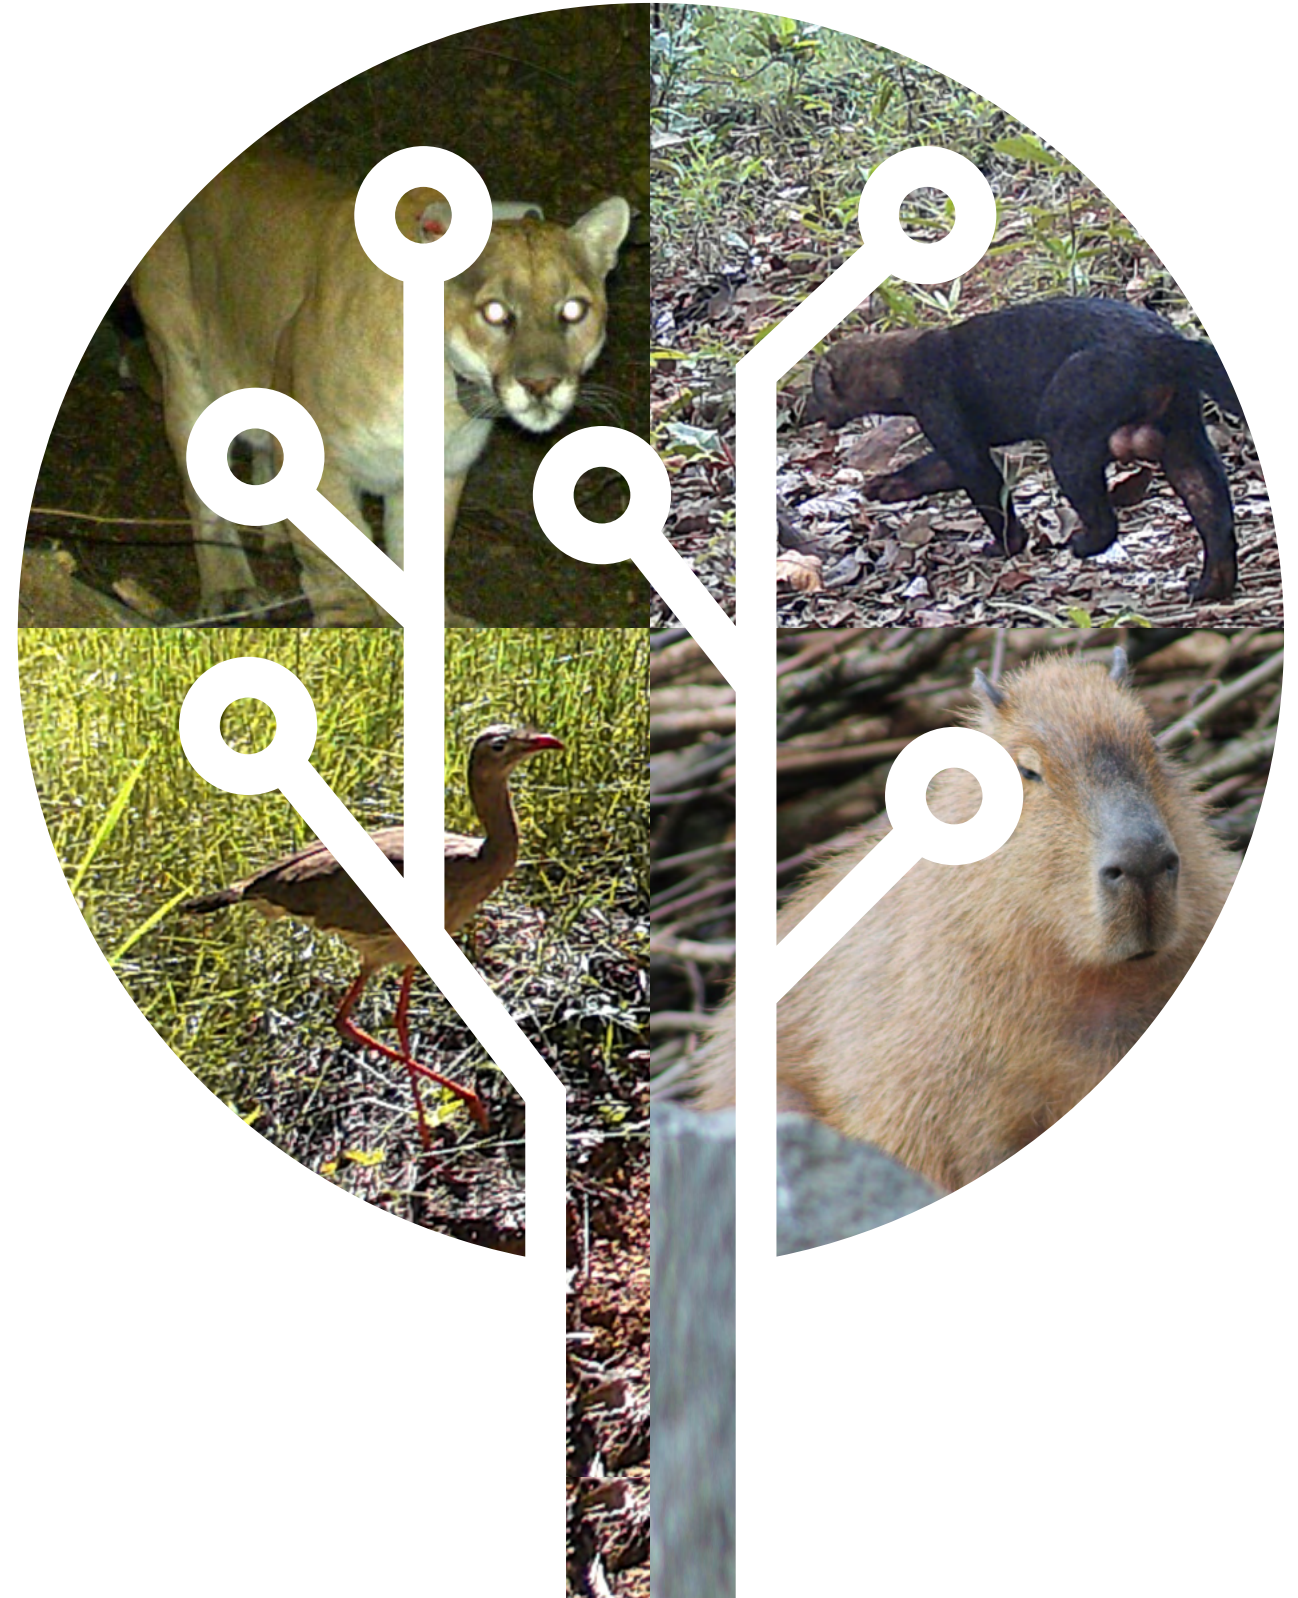

# **BRAZILIAN AGRIBUSINESS FEEDS MORE THAN 800 MILLION PEOPLE IN THE WORLD AND THERE IS STILL POTENTIAL FOR GROWTH**

# How to **promote** productivity in the country area and **preserve** fauna, flora and water?

Providing financial benefits to private owners of preserved environmental reserves.

# THE INTELLIGENT NATURE RESERVES PROJECT CAME TO LIFE IN ORDER TO BRING TOGETHER THE ENVIRONMENTAL PRESERVATION RELATIONSHIP AND THE ECONOMIC DEMANDS

We favor the creation of a virtuous productive arrangement, where the entities that make it up recognize, value, quantify and remunerate economically the efforts made by the environmental preservation

# **THE INITIATIVE INTELLIGENT NATURE RESERVES**

It is thought for governments, entities or persons that have goals, mandatory or not, related to the preservation of the environment so they can make their investments in effective preservation actions, audited, traceable and therefore subject to measurable results.

# HOW DOES IT WORK INTELLIGENT NATURE RESERVES?

Our project enables the generation of Intelligent Environmental Reserve - **RAI**: a digital token obtained by preserving the fauna, flora and water resources of the monitored environmental reserves

# OUR TECHNOLOGIES

- ✓ We use the Blockchain technology.
- ✓ Each transaction is digitally signed and encrypted.
- ✓ We have a partnership with the Binance Smart Chain company for registration, auditing and monitoring of RAls.

# PRICING AND PARAMETERS FOR ISSUANCE OF **RAI**

RAI pricing starts with the value reference of the neutralized carbon measured in ton. Each RAI is initially equivalent to 0.1 ton of carbon. Today the approximate price is R\$10 per RAI.

An emission of 500 RAIs per hectare is expected in each preserved area. This may vary according to the region's biome.

# COMMERCIALIZATION OF RAI

## 1<sup>a</sup> Stage

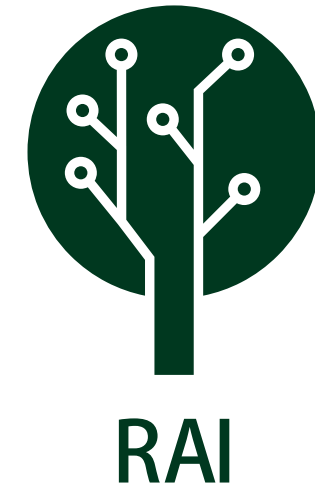

**Offer to the the big stakeholders of the agribusiness.** These organizations will be able to associate their environmental preservation target actions and the promotion of their sales by accepting RAI as payment for products and services;

## 2<sup>a</sup> Stage

Offer to organizations committed with investments for preservation of the environment;

## 3<sup>a</sup> Stage

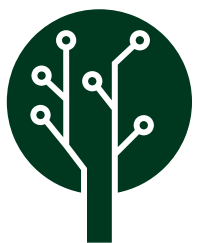

**IPO in cryptocurrency.**

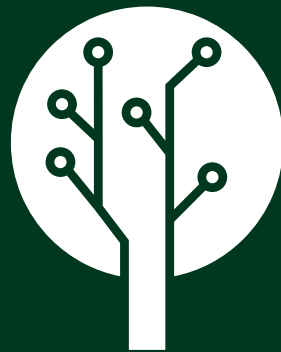

# THE INTELLIGENT NATURE RESERVES IS TAYLOR MADE FOR YOU:

- ✓ Environmental Reserve Owners
- ✓ Legal entities and individuals interested or obliged, by force of law or agreements, to invest in effective environmental preservation actions
- ✓ Consumers and buying nations of brazilian "commodities" who want a fast and efficient answer from Brazil in environmental conservation

INTELLIGENT NATURE RESERVES

# THE **INTELLIGENT** **NATURE RESERVES** VISION OF FUTURE

To be a world reference in transparency  
for environmental preservation services  
and value creation in preserved areas
